GRANDA TEAM SERVICE ON FARM  
**PRECISION FEEDING**

WE FEED YOUR FARM'S VALUE

Granda Team Service ON-FARM Precision Feeding

Dinamica Generale and Granda Team have joined forces to offer breeders the best technology and advice available concerning optimal stall performance and greater competitiveness.

## THIS TECHNOLOGY ALLOWS YOU TO:

**Control  
production  
costs  
representing  
60% of total  
production  
costs**

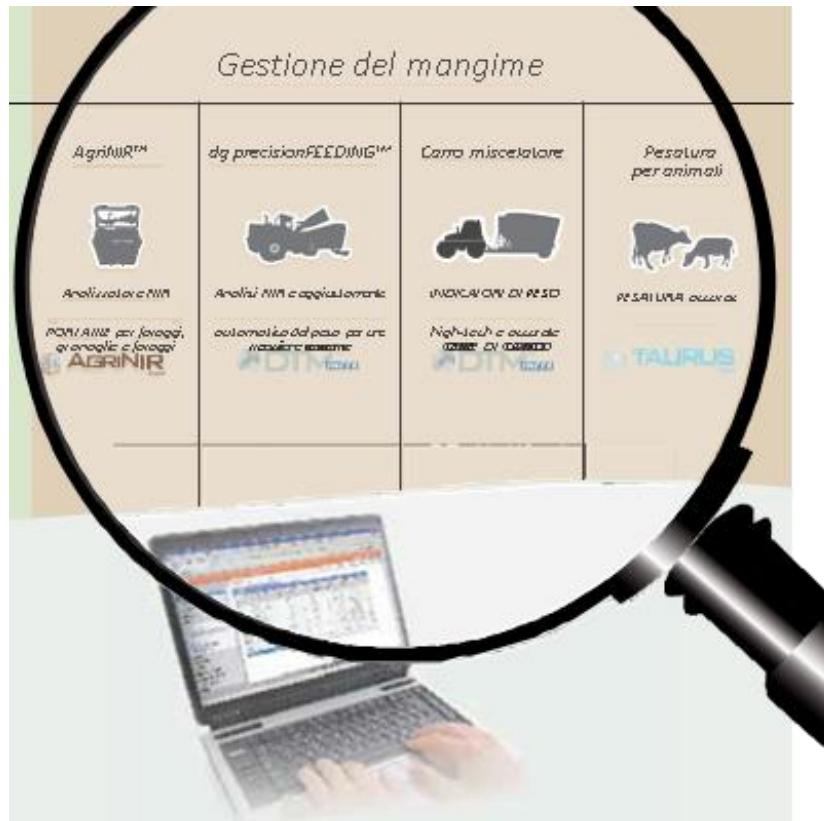

**Monitor and  
control the  
company's  
income  
statement**

**Control the  
entire production  
process**

**Improve  
efficiency**

**Achieve greater  
sustainability and  
profitability**

## The Granda Team Precision Feeding service

### Our objectives:

To support agribusiness in managing data collected during animal food preparation and distribution by using advanced IT technologies that transform it into useful benchmarks for better informed operational decisions that improve process efficiency and economic results.

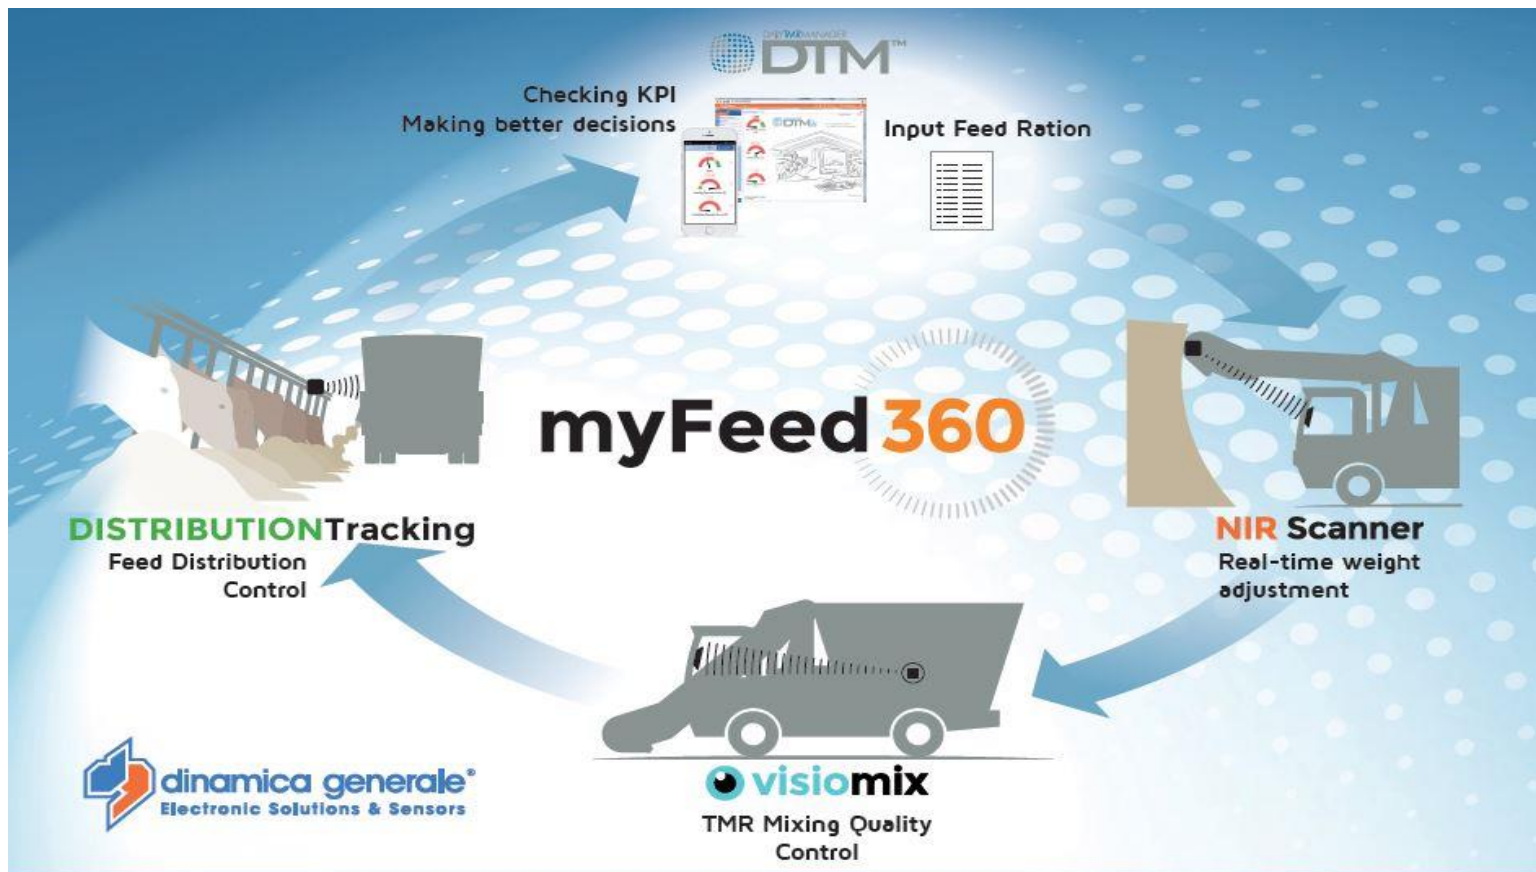

Providing farmers with opportunities to improve (ROI) return on investment on feed.

Greater accuracy with regard to feed process and dietary program management.

## MY FEED 360

### Total monitoring of the animal feed process

# MY FEED 360

## Total monitoring of the animal feed process

**1** Precision in food loading

**2** Size of ration components in terms of fiber cutting length (silage and hay/straw) and granulation of concentrates

**3** Controlling the variance of sensitive parameters related to feed conversion

**4** Feed distribution management organized by animal group and traceability

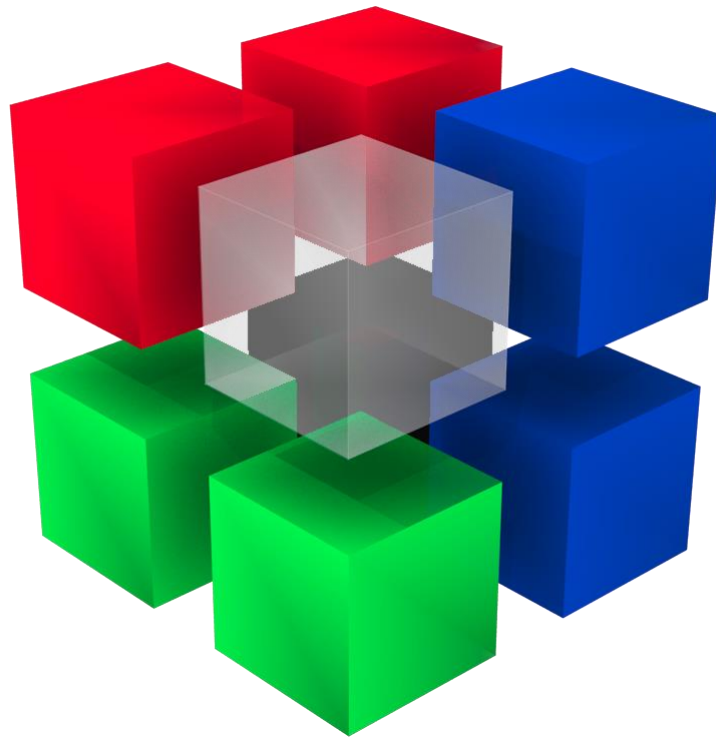

## DTM – Daily TMR Manager

The heart of the integrated power control process

## DTM – Daily TMR Manager

The heart of the integrated power control process

### **Daily TMR Manager. Total traceability of the productive process**

Total traceability of raw materials:

- Stock level variations in the warehouse
- Batch destination by animal group or individual animal
- Origin and characteristics of all purchased batches of fodder

Origin and characteristics of all purchased batches of fodder.

## DTM – Daily TMR Manager The heart of the integrated power control process

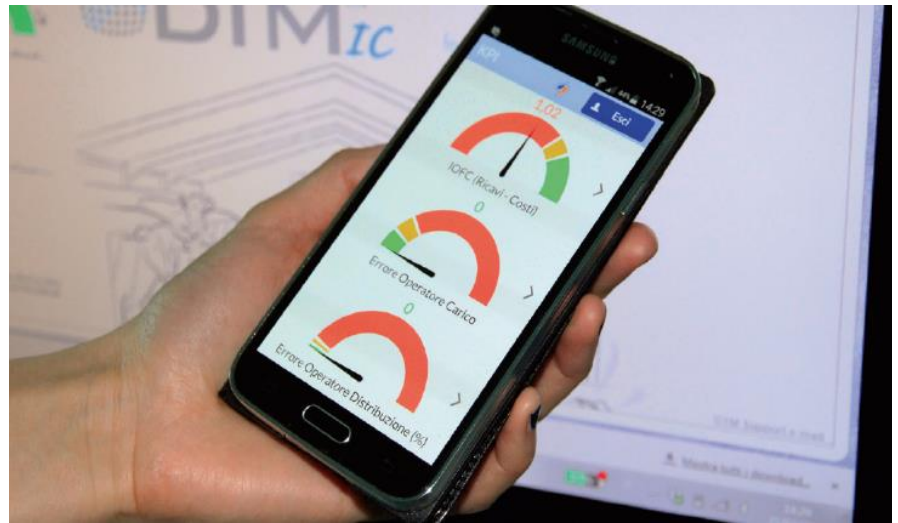

### **Dayly TMR Manager. Total traceability of the productive process**

DTM has been designed to collect data on:

- Animal diet
- Warehouse management of raw materials and supply costs
- Milk production
- Work of food workers
- Animal registry and history

## Cutting edge tools providing support with decision-making

## Cloud and App services add value to farmers' daily work

Controlling stall performance in real-time and completely mobile from a smartphone or tablet.

- Operating margin (income – costs)
- Operator error (distribution phase)
- Operator error (charging phase)

KPI, reports and detailed graphs guarantee full control of the production process and allow for rapid decision-making with reduced risks.

## GRANDA TEAM AT YOUR SERVICE

Granda Team offers management and monitoring services for feedstuff preparation and distribution processes comprised of a multilevel software platform designed by **Dinamica Generale** to optimize management of the feeding process of agribusinesses.

From defining the components and recipes, to distribution control: data about costs, timing, labor and inventory are inserted in tables and visible in intuitive graphs, either onboard the wagon or on PC, tablet or smartphone.
